EDUCATION

Department of Digital Systems (10/2019 - Present)

University of Thessaly, Larisa

Core Competencies:

- Object-Oriented Programming:** Strong understanding of software design patterns, SOLID principles, and best practices for writing maintainable and scalable code.
- Data Structures & Algorithms:** Skilled in implementing complex data structures, analyzing algorithm efficiency, and optimizing computational performance.
- Statistical Analysis & Probability:** Application of statistical methods and probability theory in computing, with experience in data analysis and predictive modeling.
- Software Engineering:** Hands-on experience with Agile methodologies, version control systems, automated testing, and CI/CD pipelines.

SKILLS

- Programming Languages:** C++, Java, Python, JavaScript, HTML, React, CSS, SQL, Flutter.
- Software & Tools:** Postman, Newman, RestAssured, OpenCV, NumPy, JavaFX, Swing.
- Operating Systems:** Linux/Unix, Windows.
- Languages:** Greek (Native), English (Proficient).

PROJECTS

AI-Based Sudoku Solver

- Technologies Used:** Python, OpenCV, NumPy, Deep Learning (CNNs).
- Overview:** Designed and implemented an AI-driven solution for solving Sudoku puzzles using computer vision and deep learning techniques.

Key Contributions:

- Developed an image processing pipeline to scan Sudoku puzzles from images using OpenCV.
- Utilized Tesseract OCR for number recognition and improved accuracy with Convolutional Neural Networks (CNNs).
- Implemented a backtracking algorithm to efficiently solve the puzzle.

Algorithm Visualization Tool

- Technologies Used:** Java, JavaFX, Swing.
- Overview:** Created an interactive visualization tool to illustrate the execution of various sorting and pathfinding algorithms.

Key Contributions:

- Designed an intuitive user interface with step-by-step algorithm execution.
- Implemented real-time visualization of sorting techniques and graph traversal algorithms.
- Added interactive controls, allowing users to navigate through each step of the algorithm.

API Testing Framework

- Technologies Used:** Postman, Newman CLI, RestAssured (Java).
- Overview:** Developed a robust framework for testing RESTful APIs, ensuring their functionality, security, and reliability.

Key Contributions:

- Automated API validation using Postman and Newman CLI.
- Designed and implemented test cases to verify the performance and security of web services.
- Utilized RestAssured in Java to create advanced testing scenarios and ensure comprehensive coverage.

ADDITIONAL

- Car & Motorbike A2 License.
- Military Service Fulfilled.
